

HDPE
(High Density Polyethylene)

HDPE has good impact and abrasion resistance, but cannot be cemented. It has a resistance to corrosion from industrial chemicals, acids and alkalis. Can be heat formed, shaped and welded.

AVAILABLE THICKNESSES

- 0.125"
- 0.250"
- 0.375"
- 0.50"
- 0.75"
- 1.00"

AVAILABLE COLORS

- White
- Natural

APPLICATIONS

- Cutting Boards
- Food Industry and Service Equipment
- POP Displays
- Ship and Boat Components
- Playground Equipment
- Protective Panels

STRENGTH

- High Tensile Strength
